**Daffa Abiyyu
Atha**

<https://github.com/DaffaAbiyyuAtha>

Daffa is a beginner who is currently pursuing a career in the programming world with a specialization as a full-stack web developer. He is skilled in using JavaScript and Go programming languages, as well as proficient in HTML, React.js, Tailwind CSS, and UI/UX Design. His educational background is in informatics, provides a strong foundation for technical understanding.

He is also a graduate of the Fazztrack Bootcamp, where he learned in depth how to become a full-stack developer with a focus on JavaScript and Go. This experience strengthened his technical skills and gave him a deeper understanding of application development from both the frontend and backend perspectives. His ambition is to continue growing in the industry and contribute through effective and innovative solutions. He is excited to join and grow with a team that drives technological innovation.

Skills

Programming Languages: Golang, JavaScript

Frameworks: React.js, Node.js

DBMS: PostgreSQL
